

School Life in 2020

School life in 2020 is weird and different
No time in the class to hang out with friends
Everything online because of this pandemic
Virtual learning is making my head spin
Teachers not available to help when I need it
I wish we could just go to school
Because being in the building was actually cool
Long days and nights spent on schoolwork
All my work has now become homework
And this is just not how my brain works
School life in 2020 is weird and different
Virtual learning is making my head spin
Everything online because of this pandemic
Online learning is the design of a madman
I wish i could just spend time with my friends
And go back home when the school day ends
